

Employee Behavior Patterns and the Impact on Organizational Outcomes & Productivity Study

(This project has IRC approval)

If you are interested in participating in this project contact the research coordinator:

Principle Investigator: Dr. Steven Cartun, MD at 814-889-2141

**Co Investigator: Kim Corle RN, MSN, MHA, CCRN at 814-889-3750, ARHS
Research Coordinator**

Purpose: To examine varied employee behavior patterns to include personal financial decision making and varied work attitudes. To evaluate the impact of various behavioral interventions, specifically employee education, on employee attitudes. In addition examine correlations between specific interventions and patient outcomes will occur.

Plan: Educational sessions will be provided to employees in specific target areas with assessment of attitudes and behavior choices prior to the education and at the completion of the education. Correlations will occur based on the results.
